

PEFile::setOptHdrSizeOfCode

```
graph LR; A[PEFile::setOptHdrSizeOfCode] --> B[PEFile::getOptionalHeader64]; A --> C[PEFile::getOptionalHeader32];
```

A diagram showing a function call branching into two paths. The function call is in a grey box on the left, and the two target functions are in white boxes on the right. Two blue arrows point from the right side of the grey box to the left side of each white box.

PEFile::getOptionalHeader64

PEFile::getOptionalHeader32
