

PEFile::getOptHdrSizeOfInitializedData

```
graph LR; A[PEFile::getOptHdrSizeOfInitializedData] --> B[PEFile::getOptionalHeader64]; A --> C[PEFile::getOptionalHeader32];
```

The diagram illustrates a function call branching into two optional header retrieval functions. A central box on the left, labeled 'PEFile::getOptHdrSizeOfInitializedData', has two blue arrows pointing to two boxes on the right. The top box is labeled 'PEFile::getOptionalHeader64' and the bottom box is labeled 'PEFile::getOptionalHeader32'.

PEFile::getOptionalHeader64
